Plantiful

AI SALES ORDER INTAKE

Stop typing orders. Start filling them.

Forward customer order emails to Plantiful — PDFs, spreadsheets, images, anything.
AI matches line items to your catalog and creates a draft sales order ready for review.

HOW IT WORKS

STEP 1
Forward the email
Customer order comes in — forward it to your Plantiful intake address.

→

STEP 2
AI extracts & matches
AI reads attachments, pulls line items, and matches to your customers and catalog.

→

STEP 3
Review the draft
A draft sales order appears in Plantiful — confirm and go.

WHAT THE AI DOES

CUSTOMER WROTE

CUSTOMER	*"Sunny Acres"*
DELIVERY	*"3/15 delivery"*
ITEM 1	*"Knockout Rose — Red, 3 gal"*
ITEM 2	*"Drift Rose — Coral, 2 gal"*
ITEM 3	*"Blue Spruce, 7 gal"*

→

PLANTIFUL MATCHED

Sunny Acres Garden Center	Matched
March 15, 2026 — Truck	Matched
Rosa 'Radrazz' Knockout #3	Matched
Rosa 'Meidrifora' Coral Drift #2	Review
No match found	Missing

BENEFITS

Reduce data entry
Forward the email and move on. The draft order builds itself.

Fewer errors
AI reads exactly what the customer wrote — no typos or transposed digits.

Free up your team
Sales staff focus on customers, not copying line items from PDFs.

Any format
PDFs, Excel, images, Word docs, or plain text emails.

BUILT FOR TRUST

- **Green / yellow / red on every match** — See at a glance what matched, what needs review, and what's missing.
- **Human review before anything ships** — Orders stay in draft until your team approves. Nothing ships unchecked.
- **One-click corrections** — Wrong match? Override the customer or product variant instantly.

SUPPORTED FORMATS

PDF | Excel & CSV | Images | Word | Plain text email

PERFECT FOR

High-volume email orders
Dozens of customer emails per day, each with different formats and layouts.

Mixed-format attachments
Customers sending PDFs, Excel sheets, photos of handwritten lists — all in one email.

Large product catalogs
Hundreds of varieties and sizes where customers use common names, not your exact SKUs.

Ready to stop re-keying orders?
